

HTML Document

Syntax <HTML>...</HTML>:

Attributes:	
VERSION	HTML version

Document Head

Syntax <HEAD>...</HEAD>:

Attributes:	
PROFILE	Dictionary of meta info

Document Body

Syntax <BODY>...</BODY>:

Attributes:	
BACKGROUND	Background image for document
BGCOLOR	Background color for document
TEXT	Text color for document
LINK	Link color for document
VLINK	Visited link color for document
ALINK	Active link color for document

Client-side Script

Syntax <SCRIPT>...</SCRIPT>:

Attributes:	
LANGUAGE	Scripting language name
SRC	External script location
CHARSET	Character encoding of external script

Paragraph

Syntax <P>...</P>:

Attributes:	
ALIGN	[left center right justify] (Horizontal alignment)

Formating Tags:

Tag Name	Syntax
Bold Text	...
Italic Text	<I>...</I>
Emphasis	...
Underlined Text	<U>...</U>
Strike-through Text	<S>...</S>
Comment Text	<!--Comment-->
Superscript	^{...}
Subscript	_{...}
Centered Block	<CENTER>...</CENTER>
Line Break	

Font Change

Syntax ...:

Attributes:	
SIZE	Font size adjustment
COLOR	Font color adjustment
FACE	Font face adjustment

Horizontal Rule

Syntax <HR>:

Attributes:	
ALIGN	[left center right] (Horizontal alignment)
NOSHADE	Solid line
SIZE	Line height
WIDTH	Line width

Heading

Syntax <H1>...</H1> to <H6>...</H6>:

Attributes:	
ALIGN	[left center right justify] (Horizontal alignment)

Unordered List

Syntax ...:

Attributes:	
TYPE	[disc square circle] (Bullet style)
COMPACT	Compact display

Ordered List

Syntax ...:

Attributes:	
TYPE	[1 a A i I] (Numbering style)
START	Starting number
COMPACT	Compact display

Definition List

Syntax <DL>...</DL>:

Attributes:	
ID	Uniquely identifies an element within a document
TITLE	Provides a title for an element and is commonly implemented as a "tool tip"
COMPACT	Compact display

Definition Term

Syntax <DT>...</DT>:

Attributes:	
ID	Uniquely identifies an element within a document
TITLE	Provides a title for an element and is commonly implemented as a "tool tip"

Anchor

Syntax <A>...:

Attributes:	
HREF	Hypertext reference
NAME	Named link destination
TYPE	Content-type of link
TARGET	Frame to render link in
SHAPE	[rect circle poly default] (Client-side image map)
COORDS	Client-side image map

Frameset

Syntax <FRAMESET>...</FRAMESET>:

Attributes:	
ID	Uniquely identifies an element within a document
TITLE	Provides a title for an element and is commonly implemented as a "tool tip"
ROWS	Row lengths
COLS	Column lengths

Frame

Syntax <FRAME>:

Attributes:	
ID	Uniquely identifies an element within a document
TITLE	Provides a title for an element and is commonly implemented as a "tool tip"
NAME	Name of frame
SRC	Content of frame
LONGDESC	Long description of frame
FRAMEBORDER	[1 0] (Frame border)
MARGINWIDTH	Margin width
MARGINHEIGHT	Margin height
NORESIZE	Disallow frame resizing
SCROLLING	[yes no auto] (Ability to scroll)

Table

Syntax <TABLE>...</TABLE>:

Attributes:	
BORDERCOLOR	Sets the colour of the border
WIDTH	Table width
BORDER	Border width
CELLSPACING	Spacing between cells
CELLPADDING	Spacing within cells
ALIGN	[left center right] (Table alignment)
BGCOLOR	Table background color

Table Row

Syntax <TR>...</TR>:

Attributes:	
ALIGN	[left center right justify char] (Horizontal alignment of cells in group)
VALIGN	[top middle bottom baseline] (Vertical alignment of cells in group)
BGCOLOR	Row background color

Table Header Cell

Syntax <TH>...</TH>:

Attributes:	
ROWSPAN	Rows spanned by the cell
COLSPAN	Columns spanned by the cell
HEADERS	List of header cells for current cell
ALIGN	[left center right justify char] (Horizontal alignment)
VALIGN	[top middle bottom baseline] (Vertical alignment)
WIDTH	Cell width
HEIGHT	Cell height
NOWRAP	Suppress word wrap
BGCOLOR	Cell background color

Table Data Cell

Syntax <TD>...</TD>:

Attributes:	
ROWSPAN	Rows spanned by the cell
COLSPAN	Columns spanned by the cell
ALIGN	[left center right justify char] (Horizontal alignment)
VALIGN	[top middle bottom baseline] (Vertical alignment)
WIDTH	Cell width
HEIGHT	Cell height
NOWRAP	Suppress word wrap
BGCOLOR	Cell background color

Inline Image

Syntax :

Attributes:	
SRC	Location of image
ALT	Alternate text
LONGDESC	Link to long description
WIDTH	Image width
HEIGHT	Image height
USEMAP	Client-side image map
ISMAP	Server-side image map

ALIGN	[top middle bottom left right] (Image alignment)
BORDER	Link border width
HSPACE	Horizontal gutter
VSPACE	Vertical gutter

Interactive Form

Syntax <FORM>...</FORM>:

Attributes:	
ID	Uniquely identifies an element within a document
TITLE	Provides a title for an element and is commonly implemented as a "tool tip"
ACTION	Form handler
METHOD	[get post] (HTTP method for submitting form)
ENCTYPE	Content type to submit form as
TARGET	Frame to render form result in

Form Input

Syntax <INPUT>:

Attributes:	
ID	Uniquely identifies an element within a document
TITLE	Provides a title for an element and is commonly implemented as a "tool tip"
TYPE	=[text password checkbox radio submit reset file hidden image button] (type of input)
NAME	Key in submitted form
VALUE	Value of input
CHECKED	Check radio button or checkbox
SIZE	Suggested number of characters for text input
MAXLENGTH	Maximum number of characters for text input
SRC	Source for image
ALT	Alternate text for image input
ALIGN	[top middle bottom left right] (Alignment of image input)
DISABLED	Disable element
READONLY	Prevent changes
ACCEPT	Media types for file upload
ACCESSKEY	Shortcut key
TABINDEX	Position in tabbing order

Option Selector

Syntax <SELECT>...</SELECT>:

Attributes:	
NAME	Key in submitted form
MULTIPLE	Allow multiple selections
SIZE	Number of visible options
DISABLED	Disable element
TABINDEX	Position in tabbing order

Menu Option

Syntax <OPTION>...</OPTION>:

Attributes:	
VALUE	Value of option
SELECTED	Choice initially selected

Multi-line Text Input

Syntax <TEXTAREA>...</TEXTAREA>:

Attributes:	
NAME	Key in submitted form
ROWS	Number of rows
COLS	Number of columns
DISABLED	Disable element
READONLY	Prevent changes
ACCESSKEY	Shortcut key
TABINDEX	Position in tabbing order

Generic Block-level Container

Syntax <DIV>...</DIV>:

Attributes:	
ALIGN	[left center right justify] (Horizontal alignment)

Generic Inline Container

Syntax ...

Metadata

Syntax <META>:

Attributes:	
NAME	Property name
HTTP-EQUIV	HTTP response header name
CONTENT	Associated data
SCHEME	Form of data
